

The first private market exchange for buying and selling residential mortgage loans through a centralized clearinghouse. Products include Jumbo A, Conforming, High Balance Conforming, Non-Owner Occupied, Mini-Bulks and CRA.

Developed by mortgage industry veterans, MAXEX's technology and infrastructure combine to create an easier, more efficient way to buy and sell residential loans. Working with MAXEX, buyers and sellers can transact with confidence, enhance the value of their mortgage assets and receive best execution pricing to drive company profitability.

### Single Counter Party for Centralized Approval & Monitoring

MAXEX acts as a single, centralized counter party with a standardized contract for both buyers and sellers, allowing each to save on costs and easily transact with multiple parties. We currently have seven buyers on our platform with more being onboarded. One loan sale contract for multiple buyers is an easier "sell" to Vendor Management.

### Independent Loan Audits

Every loan traded through MAXEX is audited utilizing proprietary audit review technology, extracting more than 1,900 data fields from a standard loan file and running thousands of validation tests to identify potential issues.

### Powerful Trading Platform

MAXEX's proprietary trading platform supports a wide array of flexible execution strategies and seamlessly integrates with your current platform. Buyers can upload rate sheets, screen for desired loans, and lift offers or show bids; sellers can quickly import loans, view live pricing, and lock or offer loans for sale.
